Introduction

Numerology:

Numerology is a study that explores the mystical significance of numbers and their influence on various aspects of life and the universe. It is based on the belief that numbers are not just mathematical symbols but carry inherent vibrational energies that can affect our personalities, behaviors, and destinies.

Mobile Numerology:

Mobile numerology is a branch of numerology that focuses on analyzing the numbers associated with your mobile phone number to derive insights about various aspects of your life. Whenever you use your phone number, you activate the frequencies or manifest the energies associated with those numbers be they positive or negative. Numbers hold a particular vibration and meaning that can influence our lives and personalities. Mobile numerology suggests choosing a number compatible with one's date of birth. Having a lucky mobile number isn't just about superstition; it's about aligning the vibrations of your digits with your life goals. A lucky number vibrates with positive frequency and attracts goodness.

How long does it typically take to experience the positive effects of a new phone number after making the change?

It usually takes 1-6 months to align & manifest the effects of a new phone number after making the change.

Mulank & Bhagyank:

In order to understand mobile numerology, we should first know how to make a numeroscope. A numeroscope is a branch of numerology that provides insights into an individual's life based on their birth date. The numbers 1-9 are placed in the grid, each with its unique position. This position is considered highly auspicious. It originated in China but we already had it in the form of Yantra.

Ideal Numeroscope:

4	9	2
3	5	7
8	1	6

Calculating Mulank:

1. Determine Your Date of Birth:

The Mulank is derived from your birth date.

The Mulank is derived from your birth date. For example, if you were born on July 26, 1985, your birth date is 26/07/1985.

2. Reduce the Birth Date to a Single Digit:

Add the digits of your birth date together and reduce them to a single digit. Here's how you do it:

- For example, if you were born on April 2, 1985,
We write it as **2** / 04 / 1985

Here, 2 is your Mulank since it is already a single digit.

- For example, if you were born on July 26, 1985,
We write it as **26** / 07 / 1985

Add the Digits of the Day: $2 + 6 = 8$

So, 8 is your Mulank because, since the date of birth was in double digits, we needed to reduce it to a single digit.

Calculating Bhagyank:

1) Start with Your Birth Date:

- You need your complete birth date to find your Bhagyank. For example, if your birth date is July 26, 1985, write it as 26/07/1985.

2) Break Down the Birth Date:

- Separate the day, month, and year from your birth date:
 - Day: 26
 - Month: 07
 - Year: 1985

3) Add the Digits of Each Component:

- Day: Add the digits of the day. For 26, this would be: $2 + 6 = 8$
- Month: Add the digits of the month. For 07, this would be: $0 + 7 = 7$
- Year: Add the digits of the year. For 1985, this would be: $1 + 9 + 8 + 5 = 23$, then reduce 23 to a single digit by adding $2 + 3 = 5$

4) Combine the Results:

- Add the results from the day, month, and year calculations:
 - Day: 8
 - Month: 7
 - Year: 5
 - Total: $8 + 7 + 5 = 20$

5) Reduce to a Single Digit:

- Finally, reduce the total to a single digit if necessary. For 20, this would be: $2 + 0 = 2$

Creating Numeroscope:

DOB: 12/11/1995

M=3, B=2

4	9	2
3	5	7
8	1	6

	99	22
3	5	
	1111	

Ideal Grid

Your Grid

- Consider the standard grid on the left seeing which we will create our grid on the right.
- To create a numeroscope consider your date of birth.
Eg) 12/11/1995
- Fill all the digits that you see in your DOB
Eg) 1,2,1,1,1,9,9,5
- Fill in your Mulank and Bhagyank in the grid.

Eg) 12/11/1995

Here, M=3, B=2

Rule: If you are born on 1,2,3,4,5,6,7,8,9,20,30 of any month then that number will come only once in the chart means we will place only DOB & not Mulank.

Eg) 2/4/1984

M=2, B=1

In this case, we will fill only 2/4/1984 i.e. DOB & Bhagyank =1 and not Mulank.

Compatibility of Numbers:

The table below shows which numbers are friendly or enemy towards each other.

Note: Wherever you find * it signifies a condition that the temporary relation between them will be good but the permanent relation between them would be bad

For Example: A person with DOB 4 if has a friendship with a person with DOB 8 then it is friendly but if a person with DOB 4 gets married to a person with DOB 8 then it is considered as enemy.

Number	Planet	Role	Lucky Number	Enemy	Neutral Number
1	Sun	King	1,2,3,5,6,9	8	4,7
2	Moon	Queen	1,2,3,5	4,8,9	6,7

Calculating Missing, Lucky & unlucky number:

- Unlucky Numbers: 2,4,8,9 --- Check unlucky numbers for both Mulank & Bhagyank.
- Neutral Numbers: 6,7 --- Check neutral numbers for both Mulank & Bhagyank.

Calculating Mobile Total:

In numerology, the Mobile Total refers to the sum of the digits in a mobile phone number, which is analyzed to provide insights based on numerological principles.

1. **Obtain the Phone Number:** Write down your mobile phone number, including the country code, if applicable. For example, +91-985-035-7543.
2. **Remove Non-Numeric Characters:** Exclude any non-numeric characters like dashes or parentheses. For instance, +91-985-035-7543 becomes 9850357543

3. Add the Digits Together:

Sum all the digits of the phone number. For example:

$$9 + 8 + 5 + 0 + 3 + 5 + 7 + 5 + 4 + 3 = 49$$

4. Reduce to a Single Digit (if necessary): If the total is a double-digit number, reduce it to a single digit by adding the digits together:

○ $4 + 9 = 13$

○ $1 + 3 = 4$

So, the Mobile Total is 4.

Creating Internal Combinations:

In numerology, mobile internal combinations refer to the analysis of different segments or sequences within a phone number to understand their individual and combined numerological influences. This concept involves examining the internal sequences of digits in a phone number to derive insights based on their vibrational properties.

Example 1) Consider a mobile number without zeros in it:

9 71 78 16 44 9

Create two-digit pairs by grouping the digits starting from the bottom and the top.

Pair 1: 97,

Pair 2: 71,

Pair 3: 17,

Pair 4: 78

Pair 5: 81

Pair 6: 16

Pair 7: 64

Pair 8: 44

Pair 9: 49

Example 2) Consider a mobile number with zeros in it:

9 7 1 0 8 1 6 0 4 9

In this case, we will exclude zero and consider only 97181649

9 71 81 64 9

Pair 1: 97,
Pair 2: 71,
Pair 3: 18,
Pair 4: 81,

Finalizing a beneficial mobile number:

Consider a DOB:

11/3/1986

M=2, B=2

Phone Number: 9717816449

- Missing Numbers: 4,5,7
- Lucky Numbers: 1,2,3,5
- Unlucky Numbers: 4,8,9
- Neutral Numbers: 6,7

	9	22
3		
8	111	6

Step 1: Identify the Mobile Total:

- Review the universal benefic numbers 1, 3, 5, and 6 to determine which can be suggested based on the grid.
- Check which benefic numbers are already present in the grid.
- For example, if the grid contains the numbers 1, 3, and 6, then 5 is the remaining benefic number that can be considered for the mobile total.

Step 2: Verify Compatibility with Mulank and Bhagyank.

- Ensure that the chosen mobile total is compatible with your Mulank and Bhagyank numbers.
 - For instance, if your lucky numbers are 1, 2, 3, and 5, then 5 can be recommended as the mobile total since it aligns with your lucky numbers.
- Typically, we recommend selecting a number that is a universal benefic number (1, 3, 5, or 6), is absent from the grid, and is harmonious with both the Mulank and Bhagynak numbers.

Step 3: Choose Internal Combinations:

- Formulate number combinations internally to meet the criteria or requirements of the client.
- For example, if you want to be good in business, good in communication, want leadership qualities, want to make your father famous/proud, want to be a good leader or Authoritative then choose a benefic internal combination 15, 51.

Step 4: Add multiple benefic combinations:

- Based on the requirements, select the ones that best meet your requirements and preferences. For example, if 15 and 37 both align with your criteria, you can consider these as suitable options.

Step 5: Select online platforms that offer numerological lucky number services.

- **Use Online Tools:** Utilize online tools or services that allow you to search for and select available numbers.
- **Consider Custom Options:** Some carriers offer custom numbers or special services for choosing a number.
- **Review and Confirm:** Once you've selected a number, review all details and confirm that it meets your needs before finalizing the choice.

Points to Remember:

1. The mobile total should be good.
2. The mobile internal pairs should be good.
3. Avoid multiples of 2,4,7,8,9.
4. Multiples of benefic numbers 1,3,5,6 should not be taken more than two times.
5. Too many zeroes should be avoided especially at the center and at the end of the number.
6. Common numbers have less impact.
For example: +91 is common for the country so it has less impact.
